**PHG Technologies Announces New Staff Members**

January 19, 2006 (Brentwood, TN) – PHG Technologies, a leader in patient identification software and products for the healthcare industry, is pleased to announce that Shana Culberson, Janelle Gunning, Jon Grabbe, Doug Heile, Joel Moenkhoff, and Jamie Sawyers have joined the company.

Shana Culberson joins PHG as company Accountant. She is responsible for all accounting functions including Month End, General Accounting, and Payroll. Prior to her current position, Culberson worked for Prime Office Products.

Janelle Gunning has been hired as Consumable Accounts Manager. She is responsible for overseeing customer accounts and orders for PHG products. Gunning previously worked for Aegis Lending Corporation.

PHG Technologies welcomes Jon Grabbe as Technical Support Specialist. He is responsible for assisting customers with technical support needs. Grabbe previously worked for Sun Microsystems.

Doug Heile and Joel Moenkhoff join PHG Technologies as Regional Sales Managers. Heile previously worked for Clear Channel Communications. Moenkhoff previously worked for Masterchem Brands L.L.C. Both will be responsible for managing the sales of PHG Technologies products in their respective territories.

PHG Technologies also welcomes Jamie Sawyers to the staff as Implementation Coordinator. She is responsible for working closely with both customers and the implementation teams to assure smooth transitions during the installation of PHG software.

Photos are attached.

PHG Technologies specializes in providing technology-based solutions to the healthcare industry. PHG Technologies has over 15 years of experience in the integration of bar-code technology into software products used for tracking supplies, inventory, assets and patients by hospitals and other healthcare facilities.

PHG Technologies' prominent product is the EasyID suite that offers forms automation and patient identification, including ID cards, wristbands and positive point-of-care identification, in one integrated system. PHG Technologies also sells a line of consumable goods, including a patented medical label solution. Other software products include the TAMS suite, which assists customers in tracking assets, inventory and patient charges.

PHG Technologies ([www.phgtechnologies.com](http://www.phgtechnologies.com)) is based in Brentwood, Tennessee, and has over 1,200 software modules installed in hospitals across America.
